Add-on for NinjaTrader 8 Trading Platform.

Percent Grid NT8 : Plots price levels specified by a percent or absolute distance from Open price of different kind of periods: Daily (with Custom Time of Day), Sessional (defined by NT Trading Hours), Weekly, Monthly, Quarterly, Yearly).

Add-on [Installation/Update](#)

It is recommended to use the standard way to remove/install add-ons in NinjaTrader. The most recent versions of all add-ons are always available to download from the [homepage](#).

1. Remove previous assembly if you have one installed:

- Run your NinjaTrader, go to the 'Tools' menu and click 'Remove NinjaScript Assembly...' menu item.
- In the list of installed assemblies appeared select the indicator you wish to update and press 'Remove' button.

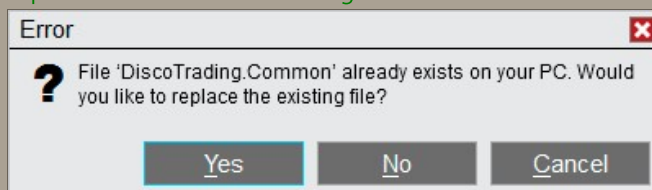

2. Restart NinjaTrader.

3. Download the latest assembly (.zip file) from this page, from the [homepage](#) or request a direct link by email.

4. Install downloaded assembly:

- Go to "Tools" → "Import" → "NinjaScript Add-On...", select downloaded .zip file and press "Open". Then if the installation was correct you will see the success message.
- Restart NinjaTrader!

Note: Various Dt add-ons are relying on the same "DiscoTrading.Common.dll" library. NinjaScript Assembly contains the most recent version of the library, so you have to click 'Yes' when asked for replacement of the file during installation.

Remember, it is required to **restart NinjaTrader after add-on installation** before you can add a just installed indicator to a chart.

Please, download and try the add-on before buying. Evaluation period is 12 days.
